PROFILE

Full-Stack Engineer and Scrum Master with 10+ years building web, mobile, and cloud applications. Reached Associate Manager level leading cross-functional teams. Served as the sole developer in the last two roles, owning everything from building to deployment across React, Next.js, Node.js, and serverless AWS microservices. Experienced in planning and shipping end-to-end solutions while leading a team or delivering independently.

PROFESSIONAL EXPERIENCE

UST Global (AU Client)

Full Stack Developer | Jan 2026 – Present

- Maintain and extend a serverless cruise-booking platform using Next.js 16, and TypeScript, with AWS Lambda and Step Functions orchestrating reservation and Braintree payment flows
- Integrate Contentful CMS via GraphQL and Redis caching to serve voyage, cabin, and availability data across multiple focused APIs

Munus Tech PTE LTD (Legal-Tech Startup)

Full Stack Developer | Feb 2025 – Dec 2025

- Built a digital appointment booking platform for lawyers and clients using React, Node.js, MySQL, and AWS
- Developed a companion mobile app using React Native
- Implemented Lambda functions with Microsoft Entra and RDS for bookings, notifications, and access control

Collabera Digital

Calculation Developer | Sept 2024 – Feb 2025

- Developed pension calculation and reporting backend services in Python
- Automated letter and report generation integrated into Git pipelines

Accenture Inc.

Software Engineering Associate Manager | Jun–Sept 2024

Software Engineering Specialist | Dec 2022–May 2024

Software Engineering Senior Analyst | Jun 2021–Nov 2022

Software Engineering Analyst | Jan 2019–May 2021

- Promoted through four levels from Analyst to Software Engineering Associate Manager, leading cross-functional engineering teams
- Served as Scrum Master, owning agile delivery, sprint planning, and team unblocking across multiple projects
- Built and maintained APIs in Node.js and Python, and developed automated Excel and PowerPoint report-generation systems

DOST – FNRI

Software Engineer | Aug 2017 – Dec 2019

- Developed full-stack platforms for nutrition and survey data collection using Node.js and AngularJS
- Digitized nationwide data collection systems for statistical research

ROHM Electronics Philippines Inc.

Production Engineer | Feb 2015 – Nov 2016

- Image Processing (legacy) development in C

SELECTED PROJECTS

- **Cruise Booking Platform** – Full-Stack Developer using Next.js, React 19, AWS Lambda, Step Functions, Contentful
- **Value Insights Platform** – Full-Stack Developer & Scrum Master for a 10-person team
- **Lawyer Appointments Platform** – Full-Stack Developer using React, Node.js, RDS, Lambda, EC2, React Native
- **Mobile Companion App** – React Native app for Lawyer Appointments platform for notifications and scheduling
- **API Boilerplate System** – Node.js template with testing, linting, CI/CD, and secrets management
- **Automated Reporting Tools** – Python developer scripts for Excel & PowerPoint reports
- **E-Survey System** – Full-Stack Developer for digitizing National food & nutrition survey portal
